CRIME DISSECTION

What do you think
about the monitoring of Crime in India?

OBJECTIVE

1. Keep track of crime rate through visualization in all states of India.
2. Identification of high alert and safe zones in India.
3. Analysing crime on basis of age and gender.
4. Educating the public with visual information to clarify crime concerns and enlist the community actions.

Data Analysis

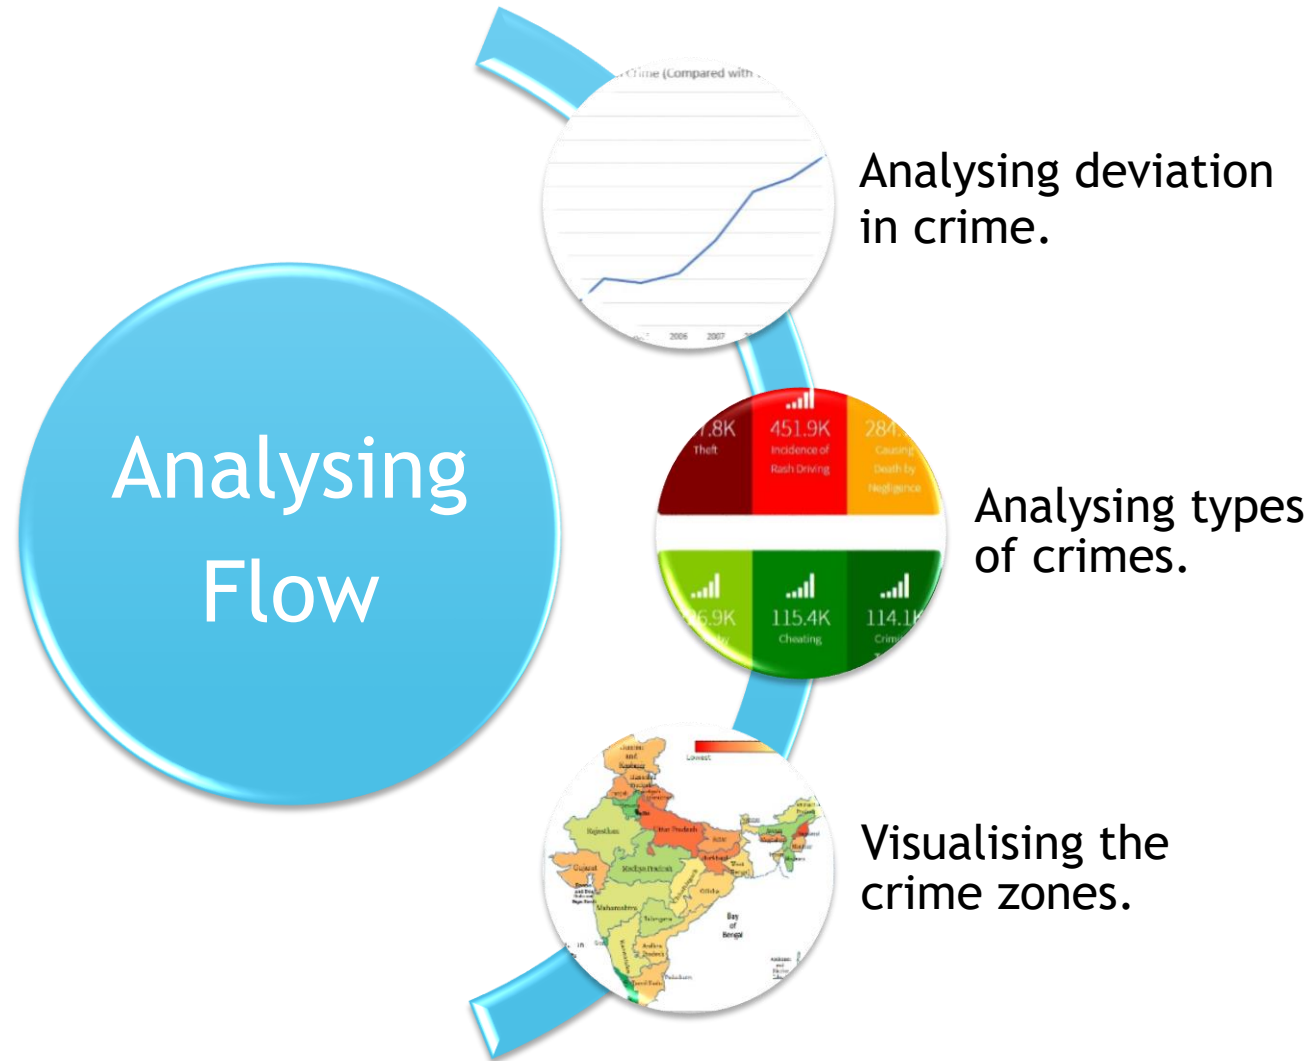

- Pre-processing the given data set.
- To identify crime pattern and series.

Pattern Detection

- Identification of high alert & safe zones.
- Keep track of the crime rate through visualization.

Crime Control

- Educating the public to clarify concerns and enlist the community actions.

How it is going on?

After analysing the data, various inferences were made on the basis of population density. This concept helps in tracking high alert and safe zones in India.

The statistics are given in the terms of rate and percent.

THANK YOU
